SUMMARY

AI/ML enthusiast and Electronics & Communication Engineering graduate with hands-on experience in Python, SQL, and machine learning. Passionate about data analysis, problem-solving, and delivering accurate, high-quality results with strong attention to detail.

EDUCATION

Bachelor of Technology in Electronics and Communication Engineering <i>Sasi Institute of Technology & Engineering</i> ⓘ CGPA : 7.3	10/2023 – 04/2026 Tadepalligudem, India
Diploma in Electronics and Communication Engineering , AANM & VVRSR Polytechnic ⓘ CGPA : 7.9	12/2020 – 04/2023 Gudlavalleru, India
SSC , Bharatiya Vidya Bhavan's ⓘ CGPA : 7.1	06/2019 – 03/2020 Pedatadepalli, India

SKILLS

Technical Skills :

- Python
- SQL
- Machine Learning
- Data Analysis
- Data Preprocessing
- Git & GitHub
- Microsoft Excel

Soft Skills

- Analytical Thinking
- Problem Solving
- Research Skills
- Communication
- Teamwork
- Time Management
- Adaptability

LANGUAGES

- English
- Telugu

CERTIFICATES

Advanced AI and Machine Learning Techniques and Capstone – Microsoft (Coursera) ⓘ

Completed an advanced AI and Machine Learning course by Microsoft on Coursera, gaining hands-on knowledge of machine learning, AI concepts, deployment pipelines, and real-world AI applications.

COURSES

Data Science & Machine Learning , Scaler	06/2026 – Present Bengaluru, India
---	--------------------------------------

Currently pursuing Data Science & Machine Learning at Scaler, strengthening skills in Python, SQL, statistics, data analysis, and machine learning through hands-on projects.

PROJECTS

Predictive Maintenance for Industrial Machinery ⓘ, Python | TensorFlow | CNN | Transformer | NASA C-MAPSS Dataset

Developed a Hybrid CNN-Transformer model for predictive maintenance using the NASA C-MAPSS dataset. Performed data preprocessing, model training, and evaluation to accurately predict Remaining Useful Life (RUL) and built a dashboard for result visualization.

PUBLICATIONS

Predictive Maintenance for Industrial Machinery ⓘ, <i>Advanced International Journal for Research (AIJFR)</i>	2026
--	------

Published a research paper on a Hybrid CNN-Transformer model for predictive maintenance, focusing on Remaining Useful Life (RUL) prediction using the NASA C-MAPSS dataset. Demonstrated expertise in deep learning, data analysis, and industrial AI applications

DECLARATION

I hereby declare that the information provided above is true and accurate to the best of my knowledge and belief.
